Why use our services?

Product History

- 30+ years in the industry.
- Product developed for US Gov't classified data environments.
- Enterprise Search Technology foundation.

Convenience

1. Easily store, search and retrieve data.
2. Cloud or On-Premise hosting to meet your needs.
3. Standard hosting packages provide desktop scanners & software for capturing information and uploading straight into VFR.

Security

1. Cloud system hosted in a facility with: Tier IV certification 7x24x365 onsite security SAE-16, PCI and HIPAA compliancy.
2. Secures each document scanned imported with 256bit encryption.

What can you expect when using the Virtual FileRoom™ (VFR) to host your data.

- ◆ Reduced Operating Costs – Our technology, combined with the industry's best data capture experts, gives you the maximum amount of savings for the minimum amount of investment.
- ◆ Increased Business Productivity – No more hard-to-read paper forms or manual entry of data. You get consistent, automated process that delivers the information you need, where and when you need it.
- ◆ One standard data integration approach.
- ◆ Improved Data Quality – Automation means consistent data capture protocols and processes, improving data quality and customer service.
- ◆ Better Data Security – In today's environment, you're always sure our solutions can meet compliance requirements. We protect your data from the moment it's captured through delivery, regardless of its location.
- ◆ Use it as a portal to access all your data sources.

Cloud Hosting

Store, Search, Retrieve

- ◆ Your existing search method becomes a virtual reality
- ◆ Separate libraries for different departments
- ◆ Scan & Index paper documents directly into VFR
- ◆ Unlimited Scalability

Find It Easily

- ◆ Customized search filters make it easy to pinpoint documents
- ◆ Fast & Easy-to-use search clue box
- ◆ Able to search across multiple libraries
- ◆ Just like your Internet Search

Manage

- ◆ User and document level security allows complete control of data
- ◆ Advanced security feature encrypts data in VFR and in transit

On-Premise

Just like storing in our hosted environment, we will bring & set up the product in your facility. Provide the experienced professional staff and work with your team to configure and put into production the system.

YES! We can also provide you with the remote system management staff needed for your success. We ensure things are maintained properly without the long-term investment of additional personnel and specialized knowledge.

We become an extension of your IT organization focused exclusively in helping you manage your unstructured data with capture solutions, workflow and Virtual FileRoom™.

WHY?

Because our mission is simple:

“Empower users to access information instantly and without barriers to uncover knowledge through technology.”

Simple Solutions for Today's Complex World™
