Data Enhancement System (Patent Pending)
Scalability and High Performance Architecture

Component acts upon actions in the Data Source and provides information

Data is accessed From standard DES Specifications

Data Information Component

Data Sources

Data in Computer Storage

Step #1: Data Information Collector Component

Information Collector Servers

Step #2: Data Access Component

Data Access Servers

Step #3: Data Preparation Component

DES Database Servers

Data Preparation Servers

Step #4: Data Enhancement Component

Technology Servers

Data Enhancement Servers

Step #5: Enhanced Data Delivery Component

Management Console on Servers

Enhanced Data Delivery Servers

Administrators & End Users

Performance & Exception Reports
